

VIKRAM SHRIVASTAV

+91 9021077286 | vikramshrivastav@gmail.com | GitHub | LinkedIn | Portfolio

TECHNICAL SKILLS

Languages: Python, JavaScript, TypeScript, SQL, C++

Web Technologies: React.js, Next.js, Node.js, Express.js, FastAPI, REST APIs

Databases & DevOps: MongoDB, PostgreSQL, Redis, Docker, AWS EC2, Nginx, Git

Generative AI: Prompt Engineering, LangGraph, LangChain, OpenAI, Gemini, Groq, Tavily

WORK EXPERIENCE

AI Engineer Intern

Feb 2026 – April 2026

Resellpur

Remote

- Built an AI-powered Amazon product matching pipeline using **Groq**, **Tavily**, and fallback search mechanisms, improving exact product matching accuracy by **70%+** across marketplace listings.
- Optimized **LLM prompting workflows** using structured prompts, role-based instructions, and few-shot examples, reducing inconsistent AI outputs by **40%+** in production pipelines.
- Developed an automated **AI moderation & fraud detection** system that moderated **1000+ listings** by detecting profanity, duplicate uploads, AI-generated images, and suspicious seller content.
- Benchmarked **GPT-4o**, **Gemini 2.5 Flash**, and **Groq Compound** models for web-search tasks, reducing estimated LLM operational costs by **35%+**.

Freelance Full Stack Developer

Mar 2026 – Present

Multi-Role Dropshipping Management Platform

Remote

- Developed a scalable **multi-role dropshipping platform** with Admin, Seller, and Supplier portals supporting centralized order, inventory, and catalog management workflows.
- Integrated **Shopify OAuth**, webhook-based order synchronization, and CSV exports for marketplaces, reducing manual seller operations by **70%+**.
- Built a **dynamic pricing engine** with customizable admin controls for homepage banners, product categories, catalogs, and subscription-based seller pricing.
- Integrated **Razorpay** with transactional database workflows and secure failure handling to ensure reliable payment processing and order consistency.

PROJECTS

Resume Ranker – AI Resume Analysis Platform

[Live Link](#)

Tech Stack: Next.js, Node.js, MongoDB, LangGraph, Docker, AWS EC2

- Built an AI-powered **ATS scoring platform** using LLM-driven resume analysis, structured evaluation pipelines, and recruiter-focused feedback generation systems.
- Engineered automated **resume tailoring workflows** that generate ATS-optimized resumes from job descriptions, structured user data, and customizable templates.
- Implemented structured **resume parsing pipelines** for extracting skills, projects, education, and experience from uploaded resumes with high accuracy.
- Deployed Dockerized AI services on **AWS EC2** behind an **Nginx** reverse proxy with API rate limiting and production-ready backend infrastructure.

NexusCreate – AI Creator Media Platform

[Live Link](#)

Tech Stack: Next.js, Express.js, FastAPI, PostgreSQL, Docker, QStash

- Built a distributed **media processing platform** for automated video compression, AI caption generation, and creator-focused content optimization workflows.
- Developed asynchronous pipelines using **FastAPI**, **QStash**, and Node.js to efficiently handle compute-heavy AI media processing workflows.
- Implemented AI-based **speech-to-text caption generation** pipelines for automated subtitle generation and scalable creator media automation tasks.
- Integrated **Cloudinary** optimization pipelines for media compression, image resizing, and faster content delivery across uploaded creator assets.

EDUCATION

JD College of Engineering and Management

B.Tech in Computer Science (CGPA: 8.93)

Nagpur, India

Nov 2022 – May 2026
